

5 WAYS TO SAVE BIG AROUND THE OFFICE

How Reducing Your Energy Use Can Add Up to Savings

1 Computer & Monitor

Putting your computer and monitor on energy saving mode and turning them off at night can save 172 Kwh a year (about \$250)

2

Personal Printers

Turning these off at night can save 108 Kwh a year

3 Copy Machine

Turning off the office copy machine at night saves 270 Kwh, or about \$40 every year

4 Desk Lamps

Turning off personal lights and relying on overhead and natural lighting can save almost 200 Kwh per light per year, or nearly \$30

5

Refrigerator

Buying an energy star certified refrigerator will guarantee that the fridge uses at least 15% less energy than the federal standard
